#### BERHOW NURSERILES Huxley, Iowa

D ear Sir:

In response to your valued inquiry for Grafted Nut Trees, I am enclosing my Price List and other information regarding these trees.

Grafted Black Walnut trees are among our fastest growers, as well as the youngest to come into bearing among edible tree crops, any many varieties start to bear as early as the second and third year after planting. It is always best to plant several varieties for good pollonation. These trees are among our hardiest trees and are adaptable to a very wide range. Only grafted and tested Carpathian (English W almut) should be ordered. Many of these offered by different parties at a cheaper price are only seedlings and therefore is a gamble and will often result in disappoint. mont.

These named improved varieties have been discovered by different people in different parts of the United States and have proved to have outstanding morits as compared with our native or wild ones. They are young bearing, excellent crackers, having high kernel percentage with sweet and light colored kernels of superior quality. They are also among our longest lived trees. They produce an anual crop of one of mans? best foods, sealed in a tight package that nover spoils and with never a worm in the nuts.

Value of nut meats in the diet as given by Dr. John Harvey Kellogg, of Battle Creek, Michigan are as follows: 1# of Black Walnut meats is equal to 14 of Boof; 61 Boof Ribs; 51 Voal; 41 Mutton; 3# Ham; 10 Chickon Broilers: 13 # Oysters: 5# Eggs and 9# Milk.

My Nut Trees are propagated, sold, carefully hand dug, and packed for shipmont by myself. They have a strong root system and have proved to transplant very satisfactorily. I am very particular in obtaining my graft wood, to be sure they are true to name.

Nul Troo Murseries are few and the demand for trees is growing by leaps and bounds, and in the past I have shipped Nut Trees to all parts of the United States, without ONE complaint, but considerable repeat orders and complimentary letters, as shown on the reverse side.

My suggestion is that if you are in the market for Nut Trees, get your order booked as soon as possible while the varieties and sizes are still to be had. Later you will have less to choose from, as well as completely sold out, resulting in one year's time lost, which will never return.

Yours very truly.

BERHOW NURSERIES

#### COMPTIMENTARY LETTERS

Berhow Mursories Fulley, lewa There Sire

I received the mit trees in first class condition, and they are fine. You furnish much better root system on nut trees than I have seen anywhere else. I expect to order more this fall.

Vory truly yours, G. W. Nadorman - - Washington

Mr. S. Berhow
Berhow Murseries
Huxley, Iewa
Sizes

I have purchased about 24 mut trees the past three years and from the appearance of your stock would say these trees are the best of the lot. I am more than pleased with them. Thank you for your courtesy and consideration.

Yours truly,
Alfred L. Barlow - - - Michigan

Berhow Nurserics Huxley, Iowa Dear Sir;

I wish to thank you for the nice but trees you sent, also the care with which they were dug. There were no broken roots.

Yours truly.

Dan Edolman - - - Kansas

Borhow Murserics Huxicy, Iowa Dear Mc. Borhows

I want to thank you for the fine stock and the good packing, I am sure I will have a 100% stand this fall.

Yours truly,
W m. L. King - - Northern Idaho

Borhow Nurserios
Huxley, Iowa
Dear Sir:
The two Black Walnut trees I receiv

The two Black Walnut trees I received from you last spring arrived in fine shape, and made a fine growth.

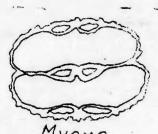

Truly yours,
Harry Engstrom - - Minnesota

#### CARPATHIAN (ENGLISH EALNUT)

The Carpathian English Walnut was discovered many years ago by a missionary R.v. Paul Crath in the Carpathian nountains in North Peland. He sent large numbers of seed muts from the best strains to the United States, which were distributed through the Wisconsin Horticultural Society.

These nuts were planted at many places and have came into bearing and have been tested as to hardyness, fruitfulness and quality.

The best ones from these tests have been propagated by Nurserymen by grafting them on black walnut stocks, which makes the best trees and are the only varieties that should be bought and planted, as these are the true reproducers of the best selected strains.

There are parties selling Carpathian trees at a cheaper price produced only by planting seed muts (known as seedlings). Seedlings do not reproduce the parent and will be inferior and most likely result in a disappointment.

The grafted and selected strains I have propogated and tested have proven practically as hardy as the black walmut and have proven to be good regular bearers of very high quality muts. The trees are rapid growers, young bearers and has a light gray smooth bark.
